

***tsu24Tg/+* (AB) (CZRC Catalog ID: CZ 415)**

Nature of the mutation

The *tsu24Tg* allele is a transgenic zebrafish line *Tg(crybb1:CFP)* in which the *crybb1* promoter elements drives CFP expression.

Genotyping assay

Genotyping of the *tsu24Tg* allele is based on the fluorescent microscopy. The CFP expression in eye lens at 72 hpf.

Figure. A transgenic zebrafish line *Tg(crybb1:CFP)*. CFP expression were observed in eye lens at 72 hpf.
