

CZ62:*s843Tg*/+(AB)

Nature of the transgene

The *s843Tg* allele was generated by random integration of pT2(kdrl:EGFP) construct.

Genotyping assay

1. Genotyping of the *s843Tg* allele is based on the fluorescent microscope. As identified by fluorescent microscope, the GFP fluorescence signal is detectable in cardiovascular system.

Figure. GFP expression in cardiovascular system at 3dpf in *s843Tg* line.
